

Information Theory II

Spring Semester 2021

Prof. Dr. A. Lapidoth / Prof. Dr. S. Moser

Signal and Information
Processing Laboratory

Institut für Signal- und
Informationsverarbeitung

Topics Spring Semester 2021

<http://www.isi.ee.ethz.ch/teaching/courses/it2.html>

- Differential entropy, including maximum entropy principle.
- The multiple-access channel (MAC).
- The broadcast channel (BC).
- Channels with states.
- Method of types, Sanov's theorem, Stein's lemma.
- Fisher Information.
- Task Encoding.
- Guessing and Rényi Entropy.

Please note that this list of topics is preliminary and might still change during the semester.
